

Diabetes Awareness

Source basis: World Health Organization - Diabetes

Source URL: <https://www.who.int/news-room/fact-sheets/detail/diabetes>

Created: 30 July 2026

Overview

- Diabetes is a chronic condition involving high blood glucose. Diagnosis and treatment planning require a qualified healthcare professional.
- Healthy eating, physical activity, regular follow-up, and taking prescribed medicines as directed can be important parts of diabetes care.

When to get help

- Contact a clinician for persistent increased thirst, frequent urination, unexplained weight loss, blurred vision, slow-healing wounds, or concerns about blood glucose.
- Do not change insulin or diabetes medicines based on a chatbot response.

This fact sheet provides general health information only. It is not a diagnosis, prescription, or substitute for advice from a licensed clinician or pharmacist. For an emergency, seek urgent local medical help. In India, call 112.
